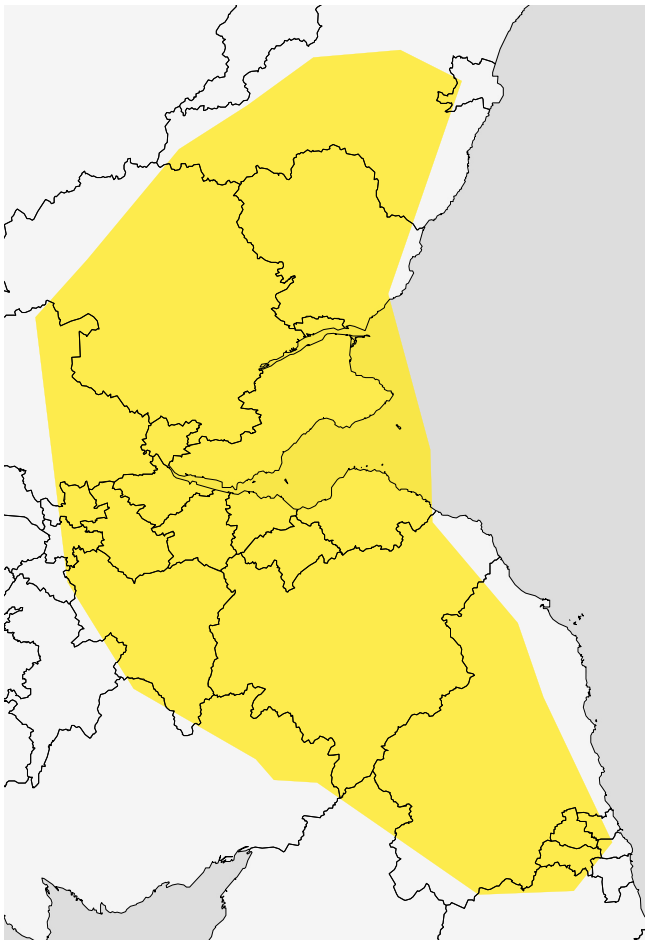
Yellow warning
Rain

Between
08:00 Tue 16 Jul 2024 and
20:00 Tue 16 Jul 2024



Some places staying dry but slow-moving, heavy showers are likely to lead to some disruption, particularly to transport.

What to expect

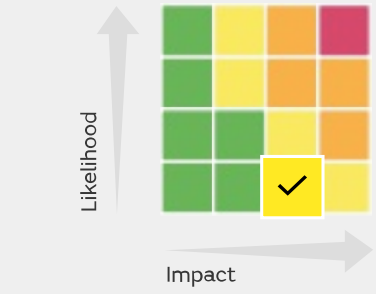
- Spray and flooding on roads probably making journey times longer
- Bus and train services probably affected with journey times taking longer
- There is a small chance that a few properties could be temporarily flooded in the heaviest showers.

Further details

Heavy showers are expected to develop during Tuesday morning, then become more widespread and slow-moving across the east of the warning area during the afternoon. Whilst many places will miss the worst, where showers do occur, 15-20 mm rainfall is likely within an hour, and perhaps 30 to 40 mm in 1 to 2 hours in a few places. The odd lightning strike is also possible.

Showers will steadily ease during the evening.

What should I do?
Consider if your location is at risk of flash flooding.



Very low likelihood of medium impacts

20:00 Tue 16 Jul 2024

Further Details (continued)

If so, consider preparing a flood plan and an emergency flood kit.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you find yourself outside and hear thunder, protect yourself by finding a safe enclosed shelter (such as a car). Do not shelter under or near trees, or other structures which may be struck by lightning. If you are on an elevated area move to lower ground.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
